

World Math Activity UN Week

As a part of our elementary UN Week celebration, we will be participating in the **World Math Day** activity. To celebrate UN Week, in addition to working on our fluency skills in math, we are also looking at the **different countries** of the children we are competing against.

If possible, as your child participates in this activity at home, please write down the name of a few of the **countries** of the children they are competing against. This information will show up as the children are competing. Please write the name of the country in the space below and return this to your child's teacher any day during UN Week.

Additional forms will be available in the ES office.

Countries my child has competed against:
